

NeighborLink
Annual Report
2024

Letter from the NeighborLink Board President

Greetings, fellow neighbors!

We are so pleased to share what Fort Wayne neighbors have done during NeighborLink's 2023-2024 fiscal year. First, praise and thanks be to our God and Father, and to His Son, Jesus Christ. We have seen new relationships and generosity in the good works completed by neighbors who serve in our city. At NeighborLink, we believe this kind of service is sourced in Jesus, who modeled humble service to the "least of these." His death brings forgiveness, and His resurrected life frees us and releases us to serve one another humbly in love. In the pages that follow, you'll see powerful stories of how our neighbors' desperate hardships were completely satisfied by loving neighbors. Oftentimes, these good deeds changed the course of people's lives, providing refreshing and beautiful examples of God's goodness and generosity.

You will also learn about uniquely motivated neighbors and groups of neighbors, who we refer to as "Stewards," who serve in Fort Wayne and other communities. Stewards leverage the NeighborLink platform to meet their vulnerable neighbors, join up with fellow neighbors desiring to serve, and bring humble service to reveal God's goodness. You will hear about the Carpenter's Sons, who put God's love into action within Fort Wayne. Just last year, Carpenter's Sons completed over 659 projects posted on the NeighborLink site, including 135 wheelchair ramp builds or repairs for those lacking safe and dependable access to their homes.

You will learn about a new partnership with our friends at AWS Foundation, the Accessibility Projects Program, which addresses access issues facing our intellectually and physically challenged neighbors. You'll be encouraged as you hear from Halie, and the direct and profound impact that volunteers and contractors participating in this partnership have had on her and her husband's lives.

You will hear how funds received and unspent during the COVID pandemic were used to meet needs for the most challenging projects needing funding and the impact upon neighbors with a fixed income. You will hear about Camp NeighborLink, an intensive 3-day serving experience put together by the NeighborLink staff that invited Fort Wayne neighbors to gather, pray, and go out to serve neighbors who requested assistance. Similarly, our staff partnered with Amp Lab, a half-day high school program for 11th and 12th graders, to join them in their journey of neighboring within the community around Electric Works.

You will hear about Brett Meyer, a former board member who engineered the current website used by NeighborLink. Brett joined our staff this past year and on January 1, became a full-time employee. Brett brings tremendous depth and a servant's heart to our technology and assists servant leaders in other communities in developing access to the NeighborLink platform to connect those in need with those looking to serve.

You will meet the incredible staff of NeighborLink, who work tirelessly behind the scenes, serving on the front lines with Fort Wayne's most challenged neighbors, providing hope, prayer, and connections with those who serve in our city. They are truly a gift from God to our city, and each has experienced God's transforming love as they daily engage in practical, neighbor-to-neighbor expressions of God's love.

Be encouraged! Neighbors who serve, donors, partner churches, agencies, and businesses are changing the cultural landscape in our city and are bringing God's light and hope to our neighbors.

John Barce
Board President

"THANK YOU ERIC!"

The NeighborLink staff and board of directors want to express their deepest gratitude to NeighborLink's Executive Director, Eric, who stepped down in early January 2025 to follow Christ's call to serve as the Pastor of Justice and Mercy for Bridgetown Church in Portland, Oregon.

Eric's leadership, friendship, and heart for others have left a lasting impact on the staff, board, and the NeighborLink community. He championed the revitalization of the platform, always encouraged the staff to think outside the box, and empowered them to use their gifts to serve others. His passion for loving neighbors and strengthening our mission will not be forgotten.

The staff and board are incredibly grateful for the 3 ½ years Eric shared with them and wish him all the best in his next chapter.

“NeighborLink provided an incredible opportunity for us to ‘be the church’ and serve a woman in our neighborhood. With many teenage hands at work, we transformed her garage, landscaping, and the front of her home. She shared her story, and our students shared theirs, building a connection beyond the physical work. By the end of the day, she had a freshly painted garage floor and window trim, landscaped beds, and a beautiful prayer garden. She was deeply encouraged, and our students were moved by the impact of their service. Being so close to our church, we invited her to stay connected and let us know of any future needs.”

Stephanie Pickett

Assistant Director of Student Ministries
Blackhawk Ministries

“Over 120 kids have been impacted by our partnership with NeighborLink. From lawn care and trash cleanups to painting fire hydrants, each project has been an opportunity to connect to others in our neighborhoods. Our favorite part? Hearing the stories of neighbors we may have never met otherwise. We’re grateful for the chance to serve and strengthen our community together.”

Cameron Charlton
City Life Director

“We were all born with the need and desire to be in relationship with our family, friends, and neighbors. Many people with disabilities lack access to experience these fruitful relationships at their most basic level inside their physical homes. Homes are meant to be places where connection, memories, and joy are captured. Too often, people with disabilities are not given that opportunity because of physical barriers inside their homes. The partnership between AWS, The League, and NeighborLink provides hope by removing barriers to basic everyday activities, such as access to a bathroom, entering the home, and simple modifications that improve the health and safety of our neighbors with disabilities. This partnership addresses the absence of joy for many with disabilities inside their homes.”

Luke Labas

Director of Inclusion Institute
The League Fort Wayne

Veterans Grant

NeighborLink is proud to partner with the State of Indiana Department of Veterans Affairs to serve those who have served us. This fiscal year, we were awarded \$19,172 to invest in projects that directly benefit veterans in need. These funds allow us to take on larger, more complex projects, such as roofing repairs, HVAC installations, and interior accessibility renovations, that would otherwise be difficult to complete.

This partnership is invaluable, enabling us to support a specific demographic in meaningful ways. We are grateful for the state’s continued trust and commitment to helping us make a lasting impact in the lives of our veteran neighbors.

BREAKING BARRIERS:

How the AWS Accessibility Projects Program is Changing Lives

At NeighborLink, we believe that everyone deserves to feel safe and independent in their own home. Yet, for many neighbors living with lifelong disabilities, everyday tasks—such as bathing, cooking, or moving between rooms—can be daunting or even dangerous.

That’s why we partnered with the AWS Foundation to launch the AWS Accessibility Projects Program, an initiative focused on removing barriers and making homes more accessible for those facing mobility challenges.

Through this program, we’ve provided critical renovations such as roll-in showers, grab bars, widened doorways, and safer flooring—modifications that allow individuals to navigate their homes with greater ease and dignity. These are not just home improvements; they are life-changing solutions that give families peace of mind and help neighbors regain their independence.

Eligibility for the program focuses on homeowners with lifelong and/or enduring physical or intellectual disabilities. From the initial assessment of the household’s interior to the final follow-up visit, NeighborLink collaborates with skilled contractors to implement solutions that truly transform lives. But our work doesn’t stop with construction—we remain committed to ensuring that every modification serves its intended purpose and provides long-term benefits.

Thanks to the support of the AWS Foundation and our compassionate community, we are able to take on more large-scale projects than ever before. Together, we’re building a more inclusive and supportive community—one home at a time.

Before

After

HALIE’S STORY

Finding Safety and Independence at Home

For Halie Brown and her husband, everyday tasks came with uncertainty and risk. Both face physical disabilities, and navigating their outdated bathroom was more than just a challenge—it was a danger. Each day, they worried that a simple routine, like getting ready in the morning, could lead to a fall.

The cost of renovations made a safe, accessible bathroom feel out of reach. However, the AWS Accessibility Projects Program made that possible. By installing a walk-in shower and making the space wheelchair-accessible, Halie now has peace of mind. These renovations were more than just functional—they were personal.

“I came home to the most beautiful bathroom. I do not often find myself speechless, but this has me speechless. My heart is overwhelmed with gratitude and joy for everyone involved in helping to make my bathroom more accessible for me. The contractors did such a fantastic job and even made it more special by adding my favorite color to the wall. The new floor pattern is beautiful, and they even took a few special resin pieces I had around and placed them in the perfect places,” she said.

For Halie, this project was about more than just safety—it was about dignity, independence, and the ability to move freely in her own home. Thanks to this transformation, Halie and her husband now have a space that allows them to live with comfort and confidence without the daily fear of injury.

At NeighborLink, we believe each home should be a place of security, not struggle. With the support of AWS and our dedicated community, we’re committed to breaking down barriers so neighbors like Halie can live with the safety, freedom, and peace they deserve.

THE CARPENTER'S SONS

Building More Than Ramps

Every Tuesday morning, a group of retired men and women gather to put their faith into action. They are the Carpenter's Sons, a ministry of the St. Vincent de Paul Society, and they have dedicated their time and skills to serving low-income homeowners in various ways, including NeighborLink's wheelchair ramp program. Their work provides far more than accessibility; it also restores independence and dignity to individuals who might otherwise be trapped in their own homes.

Carpenter's Sons completed 659 projects during our last fiscal year, including 135 wheelchair ramp builds or repairs. These projects directly impact older adults and individuals with disabilities, ensuring they can move safely in and out of their homes.

For the volunteers, this work is more than just construction—it's a calling. Mark Schmidt, a long-time volunteer, describes why this work is so important: "We're in a season of life where we have the time and health to dedicate. We also believe that God has given each of us certain abilities, and volunteering is a way to honor that gift."

Many Carpenter's Sons volunteers have years of experience in skilled trades, but others start with only a willingness to help. The key, according to Schmidt, is a willingness to learn. "Many of us started with basic abilities and developed skills through experience. Overcoming insecurities and taking on new challenges is what makes neighboring a lifestyle."

Beyond the physical labor, the Carpenter's Sons hope their work leaves a deeper impact. They want to meet tangible needs but also see their service as a demonstration of love in action. "We hope to make life easier for our neighbors while setting an example of what the Christian life looks like: one of service, faithfulness, and using our abilities for good."

These ramps and repairs provide security, stability, and a renewed sense of belonging for the homeowners they serve. For the volunteers, it's a way to live out their faith and build something that lasts—both in the structures they create and the lives they touch.

AMP LAB

Empowering Students, Strengthening Our Community

At Amp Lab @ Electric Works, students are encouraged to solve real problems for real people. Since 2022, NeighborLink has been proud to partner with Amp Lab, providing students with hands-on service opportunities that allow them to contribute meaningfully to their community while gaining real-world experience.

This partnership is more than a one-time service project—it's a continuous collaboration that empowers students to make an impact. Jeff Roberts, Amp Lab's Community Building Coach, emphasizes the importance of these experiences: "We want our students to see how their skills and energy can make a real difference. Partnering with NeighborLink allows them to engage directly with their community and develop a deeper sense of responsibility and service."

Each year, Amp Lab students participate in various service projects with NeighborLink. From raking leaves and cleaning up parks to helping construct wheelchair ramps and assisting homeowners with yard work, their involvement has been wide-ranging and deeply impactful.

One of the most inspiring moments of the partnership came when all 400 Amp Lab students participated in a community-wide effort, going door to door in the neighborhoods around Electric Works to distribute NeighborLink door hangers. Their outreach helped raise awareness of our mission and connected more residents with the support they needed.

Beyond the physical tasks, these projects are shaping future leaders. Students don't just gain volunteer hours but develop a lifelong understanding of the power of community engagement. They see firsthand that small actions—like clearing a yard or building a ramp—can profoundly impact someone's quality of life.

As this partnership continues to grow, NeighborLink and Amp Lab remain committed to creating opportunities where students can learn, serve, and build a stronger, more connected Fort Wayne. "It's about more than just the work. It's about fostering a mindset of service that lasts long after their time at Amp Lab," says Roberts.

With each new project, Amp Lab students are proving that young people have the power to change their communities for the better—one neighbor at a time.

**Inspiring Respect for
Our Community**

In mid-July, Camp NeighborLink brought together more than 200 volunteers from across the community to serve their neighbors through tangible acts of God’s love. This year, one of those groups was Respect Team, a nonprofit dedicated to empowering students through education, family engagement, and community connection. Their student board participated by taking on a leadership role and recruiting friends and fellow students to lend a hand with meaningful projects.

From mulching and painting to raking leaves and cleaning up parks, the students worked tirelessly to improve public spaces and assist local homeowners. Respect Team’s Executive Director, Jordan Kerner, shared, “Beyond the physical work, the event fostered a deeper connection among the young people we brought. Students worked side by side, strengthening friendships while learning the impact of collective service. Their dedication and enthusiasm reflected their commitment to making a difference, inspiring others to take action.”

We are grateful for organizations like Respect Team and every young person who participated, showing that the next generation is ready to lead with compassion, hard work, and a heart for their neighbors. For these young leaders, Camp NeighborLink was more than just a day of service—it was a transformative experience.

Camp NeighborLink wouldn’t be possible without the unwavering support of partners like Ambassador Enterprises. For the past three years, their generous donations have ensured Camp NeighborLink remains free for all attendees. Their support helps cover meals, event materials, and volunteer gear. Most importantly, it helps fund projects that make a real difference in our neighborhoods.

Because of Ambassador Enterprises, hundreds of neighbors, families, and young leaders have been able to step into service without barriers. Their investment continues to multiply through every project completed and every life impacted.

CAREFORTH:

Strengthening Families Through Community Partnership

For the past two years, NeighborLink and Careforth have worked together to support families in need, ensuring that individuals can live safely and comfortably in their homes. Careforth's commitment to family caregivers aligns with NeighborLink's mission, making our partnership a natural extension of shared values.

Careforth's mission is to surround family caregivers with the resources and connectedness they need to care for their loved ones at home confidently. Their programs, from Structured Family Caregiving to Caregiver Coaching, provide expert guidance, personalized plans, and connections to local support networks. Standing alongside caregivers ensures that families don't have to navigate the challenges of home care alone.

Careforth has played a crucial role in connecting us with neighbors in need of wheelchair ramps and other accessibility modifications, allowing us to assist individuals awaiting essential home improvements and, in turn, removing barriers and restoring peace of mind. Their team has also stepped in to serve directly, volunteering at Camp NeighborLink.

"Since NeighborLink and Careforth began collaborating, we've witnessed the incredible impact of their support on the families we serve," shared Care Manager Jessica Anderson. "This partnership has truly empowered our community, and together, we are creating lasting change in the lives of those who need it most."

At NeighborLink, we are grateful for Careforth's partnership. It enhances our volunteers' work, strengthens families, empowers caregivers, and builds a more connected, compassionate community.

MERCADO

Neighbors in Hospitality and Community

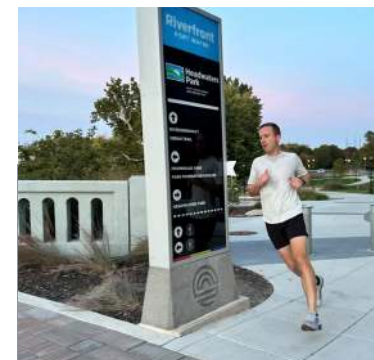

At NeighborLink, we are grateful for the incredible support of local businesses that share our mission of loving and serving our neighbors. One such partner is Mercado, a Cali-Mexican restaurant in downtown Fort Wayne founded by Johnny Perez. Johnny and his team have become invaluable partners in our work through their generosity and commitment to the Fort Wayne community.

Last year, Mercado supported NeighborLink in multiple ways. Their restaurant became a go-to lunch spot for our team, helping us cultivate relationships over shared meals. Beyond that, they provided staff lunches to local schools in partnership with NeighborLink, ensuring that teachers and staff felt appreciated. Their generosity extended further through financial contributions, including participation in our Fall Fundraiser. They even helped us revive Night Moves, a Team NeighborLink event that raised funds to replace a neighbor's roof.

Johnny Perez's heart for the community is evident in his leadership and the culture he fosters within Te Gusto Hospitality, which incorporates a variety of hospitality brands. Johnny shared, "Growing up in Fort Wayne, it's always been beneficial to be a great neighbor. It's not always the person right next to you who can benefit from a little grace. Working in the restaurant industry, we're always engaged with people from various backgrounds, and I want to ensure that we support the community in multiple ways."

We are truly grateful for Mercado's commitment to Fort Wayne and its neighbors. They lead by example, demonstrating that businesses can play a vital role in building stronger, more connected communities.

Thank you, Johnny and Mercado, for your partnership and dedication!

BRINGING WARMTH TO OUR NEIGHBORS:

The Impact of Our HVAC Program

Winter in our region can be brutal, and for many homeowners, a failing furnace is a crisis, not just an inconvenience. That's why NeighborLink's HVAC Program has remained a vital part of our mission for the last eight years, ensuring that families in need stay warm during the coldest months.

During the past winter season, we completed 17 HVAC projects, including 5 furnace replacements and 12 repairs, totaling \$21,732 in project costs. Thanks to homeowner contributions and proceeds from our hydrant painting program, the bottom-line cost of the program was reduced to \$18,077. Additionally, when donors fund projects at NeighborLink, it helps provide direct support for projects like these.

But beyond the numbers, this program represents real lives changed. Jeff Shatto, NeighborLink's Director of Mobilization, reflected on the impact: "Being good neighbors and helping one another when in need. . . that's why we do what we do." We are especially grateful to Brockman Heating & Air Conditioning, whose partnership has been instrumental in stretching our resources. By prioritizing safe repairs whenever possible rather than pushing replacements, Brockman has helped us serve more homeowners without exhausting our budget too quickly.

Additionally, we want to acknowledge Flowtech, which generously donated a furnace for a neighbor in serious need. Their commitment to going above and beyond made a lasting impact.

Our HVAC program is about more than just furnaces—it's about making sure people are cared for when they need it most. As we look ahead, we remain committed to keeping homes warm and serving our neighbors with love and dignity.

STAFF SPOTLIGHT

Brett Meyer

One of NeighborLink's core differentiators is how it leverages technology to eliminate the barriers between those who need help and those who can provide it. NeighborLink is investing in its web-based platform like never before, bringing all technology operations in-house to enhance local effectiveness and national expansion. At the heart of this effort is Brett Meyer, our Director of Technology and Growth, whose leadership is driving innovation to better connect neighbors and volunteers.

Brett's connection to NeighborLink runs deep. Since 2009, he has been a dedicated volunteer. He also developed our previous website and helped in the early stages of our expansion into an affiliate network, which saw 15 US cities adopt the NeighborLink platform since 2008. As an official team member, Brett brings continuity and fresh vision to our tech initiatives.

Before stepping into this role, Brett founded Impact Upgrade, a tech company with engineers from leading organizations like Disney, Twilio, and the Department of Defense. His expertise ensures that NeighborLink's platform operates with efficiency, security, and scalability, preparing us for future growth while safeguarding the trust of those we serve.

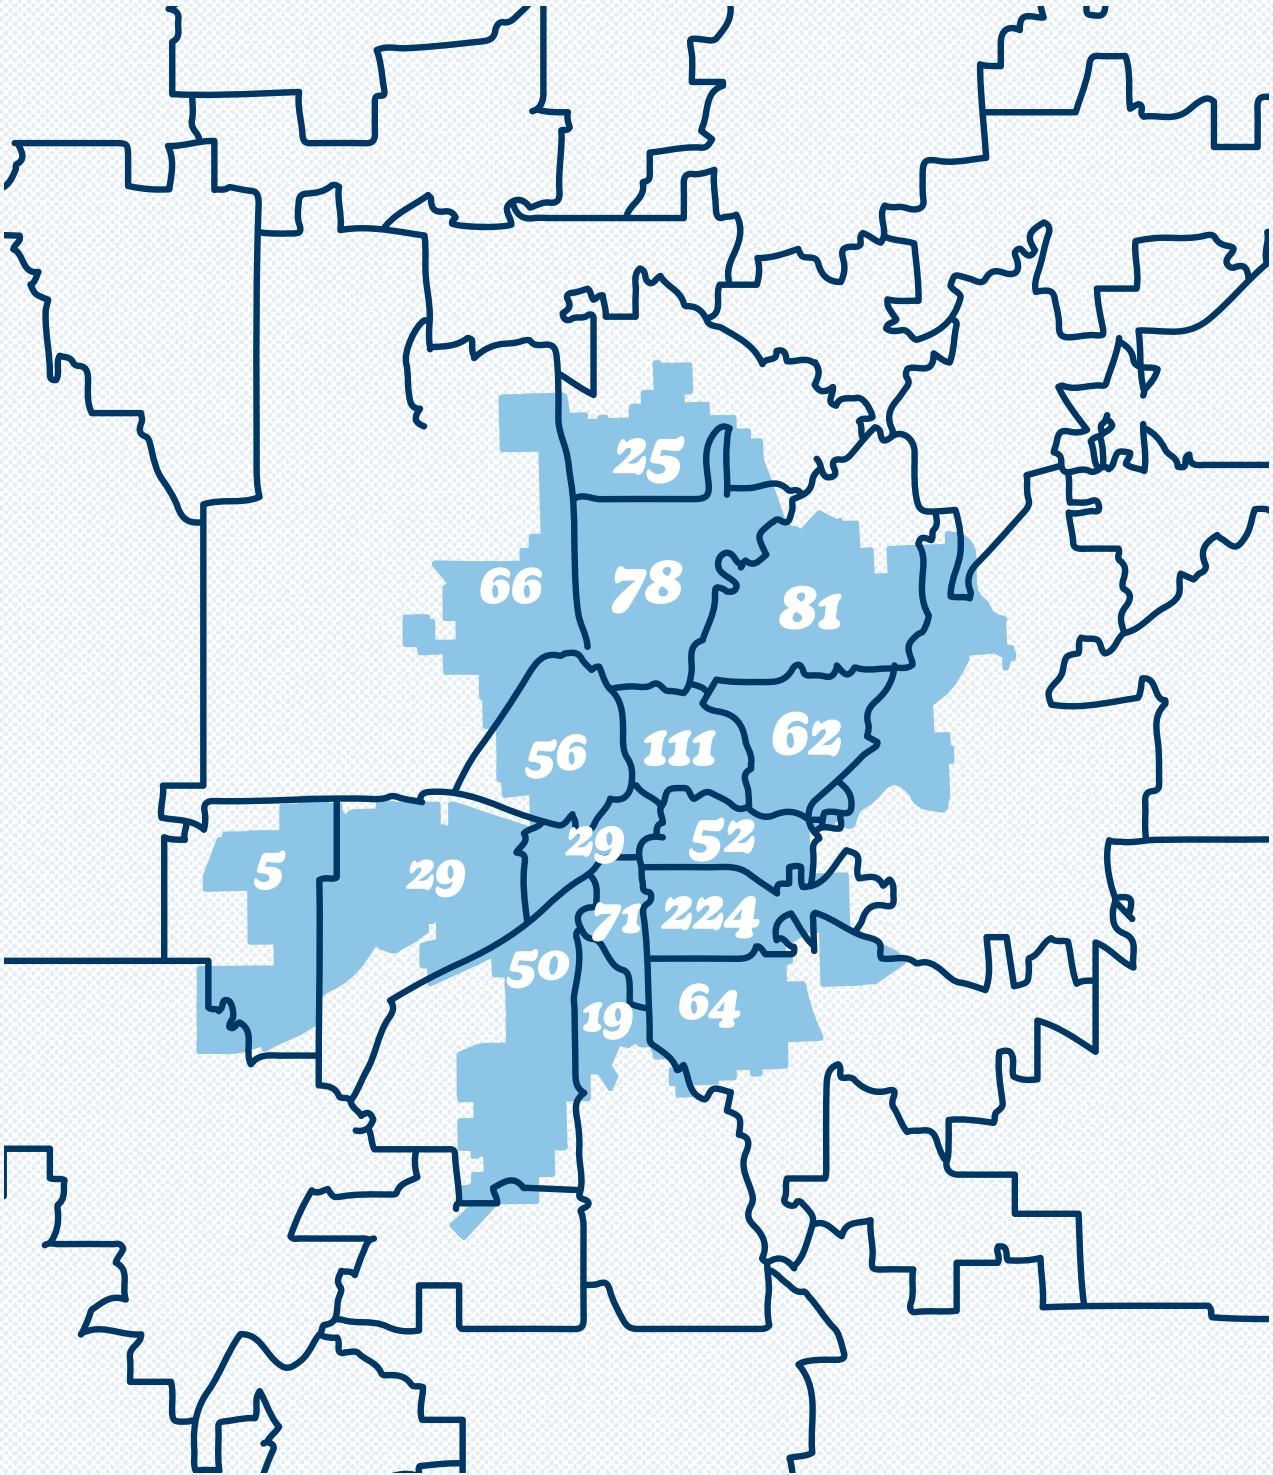

This shift isn't just about upgrading software but strengthening connections. By managing our technology in-house, we can innovate faster, ensure greater accessibility, and equip volunteers to respond more efficiently to neighbors in need.

With Brett's leadership, NeighborLink's digital tools are being refined to maximize impact in Fort Wayne and beyond. In the last few months, we've launched new communities in Mercer County, Ohio; Elkhart, Indiana; Dallas/Fort Worth, Texas; and Noble County, Indiana, with more than 25 other partnerships in development. By simplifying the process through a three-tiered playbook and leaning into accessible tools like text messaging, we're building a national movement—making it easier than ever for neighbors to show up for one another.

In 2024, volunteers painted 515 fire hydrants across Fort Wayne in partnership with the City of Fort Wayne. For every hydrant painted, the City donates \$5 to NeighborLink, resulting in a total of \$2,575 raised to support our Winter Furnace Program. Thank you to the many groups and individuals who grabbed a paintbrush and helped keep our neighbors warm. Every brushstroke makes a difference!

2024: FINANCIALS & EXPLANATIONS

In FY23–24, NeighborLink made a strategic and mission-driven decision to reinvest surplus funds from prior years to meet the growing needs of our neighbors. Most notably, this allowed us to bring back our critical roof repair program—an initiative we paused in past years due to funding limitations. Roof repairs are among the most urgent and costly needs we encounter, and their return represents a tangible expansion of how we care for vulnerable homeowners in Fort Wayne.

This board-approved investment resulted in a planned deficit of \$167,000, one we embraced with full awareness and intention. We understood that serving our neighbors in deeper and more sustainable ways would require stepping forward with bold generosity, even when it stretched our resources. This approach reflects a defining trait of our organization: a willingness to lead with love and respond when the need is great.

Throughout this period, we remained grounded in financial responsibility. Our board continues to guide a long-term strategy to balance growth and stewardship. This includes prioritizing targeted grant opportunities, cultivating new donor partnerships, and responsibly pacing service expansion to match available resources.

We are grateful for your continued support as we stretch to serve more neighbors with compassion and excellence. Every dollar given, every volunteer hour served, and every word of encouragement helps us stand in the gap between need and hope. Together, we are creating safe, stable homes—and stronger communities—across Fort Wayne.
